

Excel Environmental Resources, Inc. (EXCEL), a highly successful full service environmental consulting and engineering firm specializing in contaminated property investigation/cleanup/redevelopment and LSRP services, is seeking an entry-level Geologist or Environmental Scientist to join our team and provide technical support on a wide range of investigation and remediation projects.

Responsibilities:

- Implementation of environmental investigations
- Soil and groundwater sampling
- Air sampling
- Monitoring well installation
- Data management and evaluation
- Preparation of technical reports

Qualifications Required:

- Bachelor's degree in geology, hydrogeology, environmental science, or related field
- 0 – 1 year of experience
- Field experience including soil gas/soil/groundwater sampling a plus
- Attention to detail with strong computer skills
- Excellent communication and organization skills

Training and professional skill development will be provided for the various aspects of the position, as appropriate based on the selected candidate's experience. Apply today to join a growing NJ multi-discipline environmental consulting and engineering firm with an Employee Stock Ownership (ESOP) program, a solid reputation, and opportunity for professional development, and great benefits!

EXCEL provides generous health, dental, and paid time off benefits as well as a competitive salary, 401(k) plan, and support of ongoing professional education and training.

Apply with your resume and cover letter at info@excelenv.com. EXCEL is an equal opportunity employer and encourages diversity in the workforce.
